## SUMMARY

Full-Stack Software Engineering undergraduate skilled in **Next.js, React.js, and Node.js**, with hands-on experience shipping production-ready applications end-to-end using RESTful APIs, cloud deployment platforms, and secure authentication. Proven capability in building responsive, scalable web platforms backed by SQL/NoSQL databases and integrated AI pipelines.

## EDUCATION

- **B.Tech in IT** – IICT MGM University, Chh. Sambhajinagar (June 2023 – Present) | 8.49 SGPA
- **HSC** – Nath Jr. College, Pimpri Khuldabad (May 2020) | 71.84%
- **SSC** – SPM Gurukul, Bhangshi Mata Gad (June 2018) | 87.80%

## EXPERIENCE

- **Web Development Intern | Infinova Technologies** (Oct 2025 – Dec 2025)
  - Designed intuitive UI/UX wireframes and high-fidelity prototypes in Figma, translating designs into modular, responsive React.js and TypeScript components.
  - Integrated frontend views with REST APIs, managing client-side application state and asynchronous data binding for real-time dashboard interfaces.
  - Queried and managed datasets using SQL and MySQL Workbench to verify schema integrity and validate dynamic frontend data rendering.

## KEY PROJECTS

- **AI-Powered Investor Intelligence Platform | [GitHub](#)** (Aug 2026)
  - Built a self-hosted RAG platform that ingests financial filings (10-K/10-Q, annual reports) via `pymupdf4llm` and semantic chunking to preserve context across financial tables and commentary.
  - Implemented LLM-based KPI extraction (revenue, net income, cash flow, risk factors, growth drivers) using Google Gemini with Pydantic v2 schema validation for reliable structured JSON output.
  - Designed a dual-storage architecture – ChromaDB (HNSW indexing, metadata filtering by company/year) for semantic search and Microsoft SQL Server for structured metrics – exposed through a FastAPI backend with REST endpoints, a conversational Q&A chatbot, and a Jinja2 dashboard UI.
- **FairFare | AI-Powered Travel Budget Companion | [GitHub](#) | [Live Demo](#)** (Jan 2026)
  - Built a full-stack travel budgeting platform using React 19 (Vite), Firebase (Firestore NoSQL & Auth), Google Gemini API, and Vercel for deployment.
  - Developed an AI-powered travel companion app with automated budget itinerary generation, real-time expense tracking, and a Gemini-driven “Fair Price Guardrail” anti-tourist-trap price checker.
  - Designed a hierarchical Firestore NoSQL database schema utilizing document sub-collections and real-time subscriptions (onSnapshot).
- **IEEEConnect / E-Cell Website | Student Branch Portal | [GitHub](#) | [Live Demo](#)** (Aug 2025 – Oct 2025)
  - Constructed using Next.js 15 (App Router), TypeScript, Tailwind CSS, PostgreSQL/MySQL, Firebase Auth, and Google Genkit (Gemini Flash).
  - Created a full-stack student branch portal with real-time event tracking, interactive team directory, dynamic photo galleries, and AI-assisted content drafting.
  - Structured a normalized relational schema in SQL with foreign key constraints, role-based access control (RBAC), and parameterized aggregation queries.
- **StudyGen | Adaptive AI-Driven Learning Platform | [GitHub](#)** (July 2026 – Present)
  - Implemented using React 19 with Vite, Spring Boot (Java 21) REST APIs, PostgreSQL with Spring Data JPA, and Spring Security with JWT.
  - Delivered an AI-driven personalized learning platform featuring interactive career roadmap generation, module mastery tracking, and automated diagnostic skill assessments.

- Modeled a normalized relational database schema with cascading entity associations and transactional ORM queries for progress tracking.

SKILLS

- **Programming Languages:** Java, Python, JavaScript, TypeScript, SQL, HTML5, CSS3
- **Frontend Development:** Next.js, React.js, Tailwind CSS, Shadcn UI
- **Backend & Databases:** Node.js, Express, Spring Boot, FastAPI, REST APIs, PostgreSQL, MySQL, SQL Server, ChromaDB, Firebase (Firestore, Auth), NoSQL
- **Tools, Cloud & DevOps:** Git, GitHub, AWS, Docker, Postman, Vercel, CI/CD pipelines

CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025 Certified Generative AI Professional** – Oracle (Aug 2025)
- **Microsoft Certified: Azure Fundamentals** – Microsoft (Jan 2025)
- **Cloud Computing Fundamentals & Generative AI** – GDSC MGMU (Oct 2023)
- **Python Zero to Hero / Java Zero to Hero** – upGrad (Oct 2023)

ACHIEVEMENTS

- **LeetCode** – Solved 130+ Data Structures & Algorithms problems | [swapnilp011](#) (Ongoing)
- **1st Place Winner** – TechTrack Titans Swayambhu 2026 Autonomous Robo-Race, JNEC MGMU (Mar 2026)
- **Champion** – Maze Master Supernova 2.0 2026 Line-Following Autonomous Robot, SOET (Feb 2026)
- **1st Runner-Up** – COSMOBOLT Supernova 2.0 2026 Autonomous Robo-Race, SOET (Feb 2026)
- **Gold Medalist** – COSMOBOLT Supernova 2025 Autonomous Robo-Race, SOET (Sept 2025)
- **Top 5 Finalist** – SunHacks 2025 International Level GenAI Hackathon, Sandip University (Aug 2025)
- **Winner** – Tech Hunt 2024 Technical Problem-Solving Competition, GFG MGMU (Oct 2024)

POSITIONS OF RESPONSIBILITY

- **Technical Head** – IEEE Student Branch, IICT MGMU (Jan 2026 – Present)
- **Robotics Event Coordinator** – RoboDash Zentrix 2026, IEEE MGMU (2026)
- **College Ambassador** – Techfest 29th Edition, IIT Bombay (2025 – 2026)
- **Technical Team Member** – E-Cell, IICT MGMU (Aug 2025 – Present)
- **Active NSS Volunteer** – National Service Scheme, IICT MGMU (Feb 2025 – Present)
